With SVCE you now receive carbon free power for less than PG&E.

Silicon Valley Clean Energy(SVCE) is a community-owned electricity provider offering carbon-free energy at lower rates for a majority of Santa Clara County communities.

Your Silicon Valley Clean Energy electric charges will appear on your PG&E bill and you will receive a credit from PG&E on the bill since you are no longer purchasing its power. Below we explain how to calculate your savings.*

Enter "Generation Credit" usually found on page 3 of your bill.

CREDIT FROM PG&E Step 1 You do not need to include the negative symbol. This is the generation fee now provided by SVCE's generation service, so PG&E credits this charge back to your account to avoid any duplication of generation fees. **PCIA** Enter additional charges from PG&E: Power Charge Step 2 Indifference Adjustment and Franchise Fee Surcharge. + FRANCHISE FEE This covers energy purchased by PG&E on your behalf \$ before you joined SVCE. Enter charges for Silicon Valley Clean Energy's power, NET CHARGES Step 3 called "Net Charges" on page 4. Other fees found here, which may include an Energy Commission Surcharge and sometimes a local Utility Users Tax, are paid by all PG&E customers and are not new since becoming an SVCE customer. TOTAL CHARGES Step 4 Add the amount of the 3 boxes from Step 2 and Step 3. **TOTAL SAVINGS** Subtract the amount in Step 4 from the PG&E credit in Step 1 to see your savings. Step 5

Having trouble with the calculation? Contact our helpful call center representatives at (844) 474-7823 during regular business hours, 8 am-5pm, Monday-Friday.
