

We support your power to choose

As part of our mutual commitment to support your energy choice, Silicon Valley Clean Energy (SVCE) and Pacific Gas and Electric Company (PG&E) have partnered to provide you with a comparison of typical commercial electric rates, average monthly charges and generation portfolio contents.

If this comparison does not address your specific rate, please visit us online at svcleanenergy.org or pge.com/cca.

^{*}This compares electricity costs for an average large commercial customer in the SVCE/P6&E service area with an average monthly demand of 619 kW and an average monthly usage of 263,213 kilowatt-hours (kWh). This is based on a representative 12-month billing history for all customers on E-19S rate schedules for P6&E's and SVCE's published rates as of April 1, 2017.

Generation Rate is the cost of creating electricity to power your business. The generation rate varies based on your energy provider and the resources included in your energy provider's generation supply.

PG&E Delivery Rate is a charge assessed by PG&E to deliver electricity to your business. The PG&E delivery rate depends on your electricity usage, but is charged equally to both SVCE and PG&E customers.

PG&E PCIA/FF represents the Power Charge Indifference Adjustment (PCIA) and the Franchise Fee surcharge (FF). The PCIA is a charge to recover PG&E's above-market costs for generation resources acquired prior to a customer's switch to a third-party electric generation provider. The PCIA also applies to PG&E customers that elect to take service under PG&E's optional Solar Choice program. PG&E acts as a collection agent for the Franchise Fee surcharge, which is levied by cities and counties in PG&E's service territory for all customers.
