

We support your power to choose

As part of our mutual commitment to support your energy choice, Silicon Valley Clean Energy (SVCE) and Pacific Gas and Electric Company (PG&E) have partnered to provide you with a comparison of typical residential electric rates, average monthly charges and generation portfolio contents.

If this comparison does not address your specific rate, please visit PG&E online at pge.com/cca or call **1 (866) 743-0335**. For information on SVCE's generation rates, please visit svcleanenergy.org/residential-rates or call **1 (844) 474-7823**.

Understanding your energy choice

2026 Residential Rate Comparison, E-TOUC*

		 GreenStart
Generation Rate (\$/kWh)	\$0.12152	\$0.07402
PG&E Delivery Rate (\$/kWh)	\$0.29105	\$0.29105
PG&E PCIA/FF (\$/kWh)	-\$0.00918	\$0.03720
Total Electricity Cost (\$/kWh)	\$0.40339	\$0.40227
Average Monthly Bill (\$)	\$159.76	\$159.32

*This compares electricity costs for an average residential customer in the SVCE/PG&E service area with an average monthly usage of 396 kilowatt-hours (kWh). This is based on a representative 12-month billing history for all customers on E-TOUC rate schedules for PG&E's published rates as of March 2026 and Silicon Valley Clean Energy's published rates as of January 2026.

Generation Rate is the cost of creating electricity to power your home. The generation rate varies based on your energy provider and the resources included in your energy provider's generation supply.

PG&E Delivery Rate is a charge assessed by PG&E to deliver electricity to your home. The PG&E delivery rate depends on your electricity usage, but is charged equally to both SVCE and PG&E customers.

PG&E PCIA/FF represents the Power Charge Indifference Adjustment (PCIA) and the Franchise Fee surcharge (FF). The PCIA is a charge to ensure that both PG&E customers and those who have left PG&E service to purchase electricity from other providers pay the above market costs for generation resources that were procured by PG&E on their behalf. "Above market" refers to expenditures for electric generation resources that cannot be fully recovered through sales of these resources at current market prices. PG&E acts as a collection agent for the FF surcharge, which is levied by the California Public Utilities Commission on behalf of cities and counties in PG&E's service territory for all customers. PG&E bundled customers pay the PCIA and FF fees associated with the most currently available vintage year. PG&E charges SVCE customers the PCIA and FF fees based on the year that they transitioned to SVCE service. Visit svcleanenergy.org/your-bill for more information.

Base Service Charge (BSC) as of March 2026, your electric bill separates some fixed service costs from the price per kWh. The BSC is embedded into the average rate and bill costs presented. Visit pge.com/baseservicescharge for more information.

If this comparison does not address your specific rate, please visit PG&E online at pge.com/ccs or call **1 (866) 743-0335**. For information on SVCE's generation rates, please visit svcleanenergy.org/residential-rates or call **1 (844) 474-7823**.

Electric Power Generation Mix*

		 GreenStart
Specific Purchases	Percent of Total Retail Sales (kWh)	
Renewable	33%	47%
• Biomass & Biowaste	3%	0%
• Geothermal	0%	10%
• Eligible Hydroelectric	2%	1%
• Solar Electric	21%	24%
• Wind	7%	11%
Coal	0%	0%
Large Hydroelectric	6%	33%
Natural Gas	28%	0%
Nuclear	33%	20%
Other	0%	0%
Unspecified Sources of Power**	0%	0%
TOTAL	100%	100%

*As reported to the California Energy Commission's Power Source Disclosure Program. SVCE and PG&E data is subject to an independent audit and verification that will not be completed until October 1, 2026. The figures above may not sum up to 100 percent due to rounding.

**Unspecified sources of power refers to electricity that is not traceable to a specific generating facility, such as electricity traded through open market transactions. Unspecified sources of power are typically a mix of all resource types, and may include renewables.
