Clean, Carbon-Free Power

Your electricity comes exclusively from renewable and carbon-free sources. The Silicon Valley Clean Energy (SVCE) GreenStart and GreenPrime energy products are contributing to a cleaner electricity grid in California.

¹The eligible renewable percentage above does not reflect RPS compliance, which is determined using a different methodology.

²Unspecified power is electricity that has been purchased through open market transactions and is not traceable to a specific generation source.

³Renewable energy credits (RECs) are tracking instruments issued for renewable generation. Unbundled renewable energy credits (RECs) represent renewable generation that was not delivered to serve retail sales. Unbundled RECs are not reflected in the power mix or GHG emissions intensities above.

This information is required by the California Energy Commission to be mailed to any customer that took service from SVCE in 2020 and active SVCE customers. Receiving this notice does not mean you are a current SVCE customer. The generation data represents 2020 and is provided in the "Annual Report to the California Energy Commission: Power Source Disclosure Program." Percentages may not total 100% due to rounding.

SVCE elected to receive carbon-free resource allocations from PG&E, including nuclear, as SVCE customers already pay for it through the PG&E Power Charge Indifference Adjustment fee.

SV Clean Energy has invested more than **\$1.6 billion** in renewable energy projects totaling nearly **900 megawatts** to power local homes and businesses.
