Silicon Valley Transportation Electrification Clearinghouse Meeting

October 4, 2023
10:00 AM – 12:00 PM PDT

Links & Chat

Full Meeting ([video](#))

EV Charging Infrastructure & Services for Multifamily Housing
- PG&E Program Overview:
    o [Video](#)
    o [Presentation](#)
    o [Link](#)
- Questions about the PG&E Program:
    o Are those properties constructed before 1985 excluded or more info is needed?
        ▪ More info would be needed. We would have a quick call to review prior to a site visit.
    o Do you know what happened in the 1985 code to make it that you know electric service is ready?
        ▪ Upgrades to safety compliance.
    o Are new properties that are 100% affordable (eg under construction right now) also eligible for your program?
        ▪ Yes
        ▪ SVCE also offers incentives for new construction affordable housing in our service territory of $1-2k/charger. More details and the application are on our program website: https://svcleanenergy.org/multifamily-charging/
    o The Ecology Action direct installation program has been limited to affordable housing for the first year but will soon be open to market rate properties

Business Models for Multifamily Installations
