

Responses to Respondent Questions

1. For the [Final-Electrification-Contractor-RFP.pdf \(svcleanenergy.org\)](#) RFP, I noticed on page 11 in the Time Commitment section that the total time quoted is 8 hours *per month* for Tract 1 and 12 hours *per month* for Tract 2, but the Budget section on the same page says total hours will not exceed 12 hours *quarterly*. Just want to clarify if the anticipated time is 12 hours per month or 12 hours per quarter max?

The anticipated time is 12 hours per quarter. The work is likely to vary between quarters. The Request for Proposal has been updated to reflect the error.

2. Is the intent to have companies apply for this or individuals? If companies are to apply, is there an expectation for the same individual to participate in the full-year focus group, or can anyone participate as long as one person from the company is present/available to complete deliverables?

Both companies and individuals that meet the eligibility criteria are welcome to submit response materials. Companies may participate as long as one person consistently attends meetings and reviews inter-meeting materials. We hope this will remain the same person throughout the period, but understand this may not be possible.

3. Does SVCE intend for the current program implementors to bid on this RFP or would they be involved in these Electrification Contractor Working Groups through other channels?

Current program implementors may be conflicted from participating based on their scope of work. Existing implementors should reach out to their project managers to discuss a potential conflict.
