

GridShift Charger Rebate Program Equipment Specifications

Single family homes are eligible for one rebate per household. To qualify you must:

- Purchase and set up a **new**¹ and qualified charger
- Own an eligible vehicle
- Participate in two GridShift managed charging sessions

Purchase & set up a qualified charger		
Qualified Chargers		
Charger Brand	Charger Type	Rebate Amount
Autel MaxiCharger AC Elite	Home 50A 12kW and 40A models - https://store.autelenergy.com/collections/ac-elite-ev-charger	\$250
ChargePoint	Wi-Fi enabled Home Flex models - https://www.chargepoint.com/drivers/home/chargepoint-home-flex	\$250
Emporia	All models - https://shop.emporiaenergy.com/collections/ev-chargers	\$250
Wallbox	Pulsar Plus – https://wallbox.com/en/pulsar-family	\$250

- The charging site must be associated with an active SVCE account.
- Rebates are available on a first-come-first-served basis, while supplies last.

Own an eligible electric vehicle
The charger rebate is designed to increase accessibility to the benefits of EV smart charging with GridShift. Vehicles that are already compatible with GridShift, the vehicles listed below, can start using the app immediately and are not eligible for the rebate. All other electric vehicles qualify!
The vehicles on this live list are already compatible with GridShift and DO NOT qualify for the EV Charger Rebate.

¹ Refurbished chargers are **not** considered “new.”

Participate in two managed charging sessions	
GridShift App	
Steps	Instructions
1. Download the app	Go to your app store and search for GridShift, download and open.
2. Create your account	Create your login and enter your home address and confirm its location on the map. GridShift will only optimize your charging within 500 feet of this location. You will be able to charge at public and rapid chargers as normal.
3. Connect your vehicle and charger	Select your vehicle make and model. On the "How do you charge your vehicle at home?" page, select "I have a home charger," then select the brand of your charger. Follow instructions to connect your charger to the app.
4. Confirm you are a SVCE customer	Enter the phone number, e-mail address, home address, or the account number associated with the PG&E/SVCE account you will be charging on. This also allows us to automatically sync to your rate plan and charge your vehicle during least expensive hours.
5. Set your smart schedule	In the "Smart" tab, customize your smart charging schedule by entering the time you need your vehicle charged and ready to go. We'll make sure to always have your car charged to the battery level you independently set in your vehicle, before the ready-by time you've entered.
6. Perform two managed charging sessions	Smart charge two times by simply setting your ready by time and letting the app take care of the rest.
